POLYAS

POLYAS FACT SHEET

POLYAS IS THE LEADING PROVIDER OF ONLINE VOTING SERVICES

Polyas Online Voting Services was founded by Wolfgang Jung. In the summer of 1996 he conducted the first online election in Finland, with 30,000 voters in three languages. Its success led to development of the Polyas system by Micromata Software Company, and to its spin-off in 2012.

In 2015 the online elections platform was launched as a web service. For ensuring the secrecy of the ballot, Polyas has been certified as the worldwide first online voting provider, according to Common Criteria Standards in 2016.

OUR CUSTOMERS

Since 2012 over 500 institutions have voted with Polyas - elections ranging from 100 to 800,000 voters. So more than 3 million people voted online with Polyas so far.

Companies, cooperations, associations, universities, churches and professional associations have conducted quick and easy online elections with us.

BOARD OF DIRECTORS

Kai Reinhard
Co-Founder and Investor

Founder and Senior Developer

OVERVIEW

Founding and spin-off → **1996 and 2012**
Worldwide number of empolyees → **20**
Website → **www.polyas.com**

OUR PRODUCT

Polyas has developed software for legally binding online elections. Customers can set up and run elections over the Internet themselves.

1. Create a ballot containing candidates, lists or pollings
2. Upload the electoral roll and check the voters list
3. Set up the framework and define voter information

OUR PREMIUM SERVICE

Election Preparation
Developing individual voting procedures and respective technical features

Election Management
Configuring ballots and electoral roll, determining suitable time frames and informing the electorate

Election Implementation
Full service from online voting experts, making individual adjustments and combining voting procedures
